

“If you look at an old metal crate and the Gallagher Sheep Auto Drafter side by side it’s like looking at a model T Ford versus a modern motor car.”

The Sheep Auto Drafter was developed with help from a world-leading animal behaviourist and as with all Gallagher products it has been thoroughly road tested in preparation for its launch.

- 80kg Robo sheep has smashed into the entry doors 2500 times (equivalent to 2 bags of cement thrown at gates)
- Flooring material had 250,000 sheep walk over it with no visible signs of deterioration

It's like drafting on autopilot

The new Gallagher Sheep Auto Drafter, redefining sheep weighing & drafting

Sheep Auto Drafter
G05714

Features

REMOTE CONTROL OPERATION

Unit can be controlled by one operator.

FLEXIBLE

Adjustable sides to handle small lambs to the largest rams.

HIGH VISIBILITY CONTROL PANEL

Includes emergency stop button, auto/manual status & fault lamp.

“Our unique approach means that not only is the new Gallagher Sheep Auto Drafter robust and ready to handle even the toughest farm environment, it’s also very quiet. This keeps stock calmer and the whole operation running more smoothly.”

Sheep Auto Drafter main unit + one 3 Way Drafter Module
- 790mm wide x 2439mm long

3 Way Drafter Module
- 660mm wide x 794mm long

Accessories
G05730 (Sheep Auto Drafter Lead On Race)

The Sheep Auto Drafter is a fully automated weighing and drafting system that is smoother, quieter and easier to set up and operate than any other sheep drafting product on the market. The Gallagher Sheep Auto Drafter includes the weigh crate, integrated load cells, integrated control module with remote control and three way draft module. Just add a suitable electronic weigh scale and you’re ready to go!

The Sheep Auto Drafter also has an additional drafting module that will increase the drafting capability, allowing up to nine way drafting (sold separately).

Side panels with in built electronic ear tag compatibility are included, plug in a reader controller (sold separately) to develop equipment into an EID capable system.

- Automatic operation – entry gate controlled by machine, drafting becomes a one-person operation
- Silent – very quiet both electronically and audibly – handles EID well and sheep are not frightened
- Sheep friendly design – high stock throughput
- Portable – lightweight and easily transportable
- Indestructible – composite material withstands repeated sheep impact
- Integrated control – plug in air and power and the system is ready to go
- Improved Health and Safety for sheep and operator – no trapping points or metal bars to walk into.
- Faster flow – short travel split gates for rapid capture and release at entry and exit
- Extended life - Integrated stainless steel load cells for extended product life
- Flexible – adjustable sides to handle small lambs to the largest rams
- Compatible with Gallagher and TruTest weigh scale indicators
- 1 year warranty on electronic and moving parts
